### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in view of correcting the obvious minor informalities:

#### IN THE SPECIFICATION:

On page 3, line 1, "distinction" is changed to --extinction--.

#### IN THE CLAIM:

In claim 1, line 8, "distinction" is changed to --extinction--.

### *Allowable Subject Matter*

2. Claims 1-12 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The Prior art (i.e. Kondoh et al) discloses that a photoconductive relay comprising a light emitting device (101), a photoconductive switching element (102) and columns (103) that extend between the light emitting device and the photoconductive switching element. While columns of the prior art are formed by heating conductive fusible bumps to melt them, and cooling the molten bumps to solidify them into columns which interconnect the light emitting device and the photoconductive switching element, the present invention includes an additional third substrate, having through holes for transferring the light from the light emitting device to the

Art Unit: 2878

photoconductive switching element arranged between the light emitting device and the photoconductive switching element. The third substrate is connected with a first substrate by heating and pressure contacting of a metal member (i.e. a bump). It would have not been obvious to one of ordinary skill in the art to modify the device of Kondoh et al by adding such a third substrate between the light emitting device and the photoconductive switching element since it would increase the size of the device as well as the manufacturing cost.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hori (6,643,920) is cited for disclosing the use of a bump for joining a circuit element and a substrate.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Pyo whose telephone number is (571) 272-2445. The examiner can normally be reached on Mon-Fri (with flexible hour), First Mon. off.
